

Prof. Serge Savary

Adjunct Professor, Plant Pathology

Prof. Serge Savary is Director Research INRAe (France) and worked with the International Rice Research Institute for nearly 20 years. He obtained his PhD in Plant Pathology from Wageningen Agricultural University. Prof. Savary is well known epidemiologist, and contributed to understanding and managing the plant diseases and plant health, and sustainable development. Prof. Savary worked in West Africa for ten years on diseases of grain legumes, vegetables and cassava. He is Editor-in-Chief of “Food Security”. He is a Fellow of the International Society for Plant Pathology, and of the American Phytopathological society.
